MEETING PLACE FOR OUTSIDE GROUPS

In addition to conducting an extensive educational program, St. Cloud State College serves as a meeting place for many state and regional organizations and professional groups. Scores of workshops, conventions, conferences, short courses and institutes are conducted on the campus annually because of its central location and suitable facilities for accomodating large groups. Were it not for the college, most of these meetings would be held in some other city. It is estimated that persons who attend meetings that last more than one day spend in the neighborhood of \$10 per day in the city. Thus a two-day meeting for 200 persons brings approximately \$4,000 in business to St. Cloud firms.

As the college continues to expand, even more and larger groups will schedule their meetings on the campus.

Not only does the college serve as a meeting place, but its own concerts, lectures, exhibits, plays, demonstrations, contests, and athletic events attract thousands of persons to the campus annually. Also during the school year, hundreds of recruiters for schools business and industry come to the campus to interview students--and spend money in the community.

Examples of meetings conducted on the campus during the 1961-62 school year are:

CULTURAL CONTRIBUTION TO THE COMMUNITY

One valuable contribution the college makes to St. Cloud which cannot be measured in dollars is its cultural contribution.

Within the college community are hundreds of professors and students who, during the school year, take an active part in civic, church, youth, service, and cultural programs. College faculty members serve as speakers on many occasions and as leaders and planners for all sorts of organizations and projects. Students sing in church choirs, teach Sunday School classes, provide entertainment, help in charitable campaigns, serve as scout masters, assist in the city recreation program, and so forth.

Hardly any project is undertaken in the City of St. Cloud without enlisting the support of persons associated with the college. This is obvious to anyone who reads the daily paper or listens to the local radio stations.
