FLY TO ATLANTIC CITY

If you are planning on going to the AECT Convention in Atlantic City, perhaps you may want to go with a group. The group that went last year to Las Vegas had a very good time and, friendship and fun should not be in short supply this year. The United Airlines non-stop flight will leave the Twin Cities on March 17, at 11:40 a.m. have lunch on board and arrive in Philadelphia at 2:51 p.m. You and your baggage will be transferred to a bus for a 90 minute ride to Atlantic City for your stay at Colony Resort only four blocks from the convention center. The group will return on March 21, 1974. The price will be \$199.00 per person which includes the airfare, bus, baggage handling of one large piece per person, baggage tips, sharing a twin bed room for four nights and hotel taxes. You may leave earlier for an additional \$48.08 airfare plus your additional hotel. You may stay longer at no increase in the airfare. CENTENNIAL HAPPENINGS

The Learning Resources Center recently received an autographed copy of Fanny Butcher's Many Lives—One Love. Catherine Hurley of Chicago, IL gave the book to the college after reading about the library's Sinclair Lewis collection in the recent Sinclair Lewis Newsletter. "This book has particular significance to us since one chapter of her book deals with the personal life of Sinclair Lewis and the author's life-long friendship with Lewis," said Dwight Burlingame, LRS.

LRC Host Visitors—Four officials of Breck School in Minneapolis recently visited the Learning Resources Center in preparation for building their own facility. We also were visited by representatives from Pan American University and South Dakota State University.

Graphis Move—The graphics area of the Production Division in LRC moved to a new area in the basement of Centennial Hall. The new space is twice as large as the old area. This move also allowed for expanded audio and photographic production facilities.

TV Studio—The new television studio in the basement of LRC is coming along and should be ready for installation of equipment within the near future.

CONFERENCE ON MEDIA EDUCATION IN MINNESOTA

St. Cloud State College through its Department of Library and Audiovisual Education, School of Education, in cooperation with the Minnesota State Department of Education is sponsoring a "Conference on Media Education in Minnesota" for persons involved in the education of personnel for school media positions grades K-12. Conference participants are selected by each college and university in Minnesota which has a program leading to endorsement as school librarians, audiovisual coordinators and directors, and/or media generalist and media supervisors.

The purpose of this conference is to study the status of media education in Minnesota in relation to present and future needs. The conference will begin at 3:00 p.m. on Sunday, January 13, 1974 in Centennial Hall and will conclude at 3:00 p.m. on Monday, January 14.

PROFESSIONAL ORGANIZATIONS

What can AVCAM and MASL do for me? This is a question often asked by media persons when asked to join the state audiovisual or library professional organizations. To paraphrase a famous quotation "ask not what AVCAM and MASL can do for me, but what can I do for AVCAM and MASL?"

Now is the important time in the history of these two organizations. Both organizations need continued input from media professionals in the field. By joining and participating in these organizations, you can help. AVCAM has just completed their annual leadership conference at M.I. Smith. MASL is having its biennial conference at Maddes next month. At each of these meetings plans were and are being made to help the media profession in Minnesota to grow and prosper. Without your support, the plans developed cannot mature to their fullest. Your input is needed in order that the professional organizations will continue to perform in the way you want them to perform. Unless you join and participate, you have no complaint if the organizations do not accomplish what you would like to have accomplished.

MASL and AVCAM need you and you need them.
